

Call for Tutorials

DAS 2018 is the 13th edition of the 100% participation single-track IAPR sponsored workshop **focusing on system-level issues and approaches in document analysis and recognition**. The workshop comprises invited speaker presentations, oral, poster, tutorial sessions, as well as working group discussions.

DAS2018 intends to offer conference participants high quality half day tutorials reflecting current topics and trends in all areas of Document Analysis and Recognition. As tutorials are educational events they must include a comprehensive introduction to the state-of-the-art in the corresponding subject. Tutorials should be aimed at varied audience: research students, experienced researchers, practitioners, academics and representatives of governments and funding agencies who wish to learn new technologies.

We encourage submissions of proposals for tutorials on all topics in the established areas of DAS, tutorials bridging those areas, or tutorials introducing new perspectives in those areas. Tutorials could be theoretical; however, we strongly encourage organizers to incorporate hands-on sessions and practical examples at every opportunity.

Proposal Structure

Tutorial proposal submissions must contain the following sections in the suggested order:

1. **Title:** A concise title.
2. **Presenter(s):** The names, affiliation and contact information of the presenter(s).
3. **Abstract** (1 paragraph)
4. **Intended Audience** (1 paragraph): Describe the background assumed of tutorial attendees. Tutorials may range from basic for attendees new to the field to advanced topics for experts.
5. **Expected Attendance:** Provide an estimate (justified where possible) of the likely number of participants and some informal evidence that people would attend (e.g., related workshops).
6. **Motivation and Learning Outcomes:** A statement (no more than 1 page) giving clear motivation/justification for the topic to be presented at DAS. Why is the tutorial important? Why is the tutorial timely? How is it relevant to DAS? What the audience will have benefited from (new skills/knowledge) at the end of the tutorial?
7. **Topic and Description:** A detailed description (no more than 1 page) of the tutorial topic, providing a sense of both the scope of the tutorial and depth within the scope.
8. **Program:** An outline description (no more than 2 pages) of the different sessions – if applicable – and their duration, together with justification that a high-quality presentation will be achieved within the chosen time period. Tutorials should be scheduled for half a day (3 or 3.5 hours). Tutorials will take place on Tuesday, 24th April 2018.
9. **Previous Editions.** If the tutorial was given before, when and where was it given and how will it be modified for DAS2018? If possible, provide a link to slides from the previous tutorial presentation.

10. **Material:** A description (1 or 2 paragraphs) of material to be provided to attendees on the conference website – course slides, annotated bibliography etc. NOTE: the materials themselves do not need to be provided in the proposal.
11. **Equipment:** Indicate any special equipment needed (if any). The standard equipment will include a projector and a single projection screen.
12. **Biographical Sketch(es):** A half-page bio-sketch of each tutorial presenter must also be included.

Submission and Selection Procedure

Proposals following the structure above must be submitted by email in PDF format to das2018-tutorials@caa.tuwien.ac.at.

All proposals will be reviewed by a selection committee, comprising DAS2018 Chairs. The committee will make the final selection of tutorials in order to ensure the highest quality and present the greatest variety to conference participants and to fit the conference schedule.

Important Dates

Tutorial Proposals due 30th November 2017

Tutorial Announcement: 15th January 2018

Tutorial Date: 24th April 2018

Note that Tutorials are **free** for registered participants
